INTRODUCTION

MITCOIN is designed to be the world's most secure cryptocurrency, offering users and exchanges a new level of security in digital assets. MITCOIN's cutting-edge technology enables transaction pausing and reversal, which provides unprecedented protection in case of wallet compromise. MITCOIN will be supported by MIT EXCHANGE, a secure crypto exchange, and MIT WALLET, a robust digital wallet offering built-in security measures. Backed by a team with over 50 years of experience in finance, MITCOIN is poised to become a world currency, setting a new benchmark in cryptocurrency security and usability.

PROBLEM STATEMENT

Security is a significant concern in the cryptocurrency space, where billions of dollars are lost annually due to wallet and exchange breaches. Traditional cryptocurrencies lack mechanisms for reversing stolen funds, leading to a trust deficit in the market.

Key issues include:

- Insufficient security measures to prevent and respond to wallet breaches.
- Lack of recovery options for stolen assets.
- High risk of token dumping post-airdrop, impacting market stability.

SOLUTION

MITCOIN

MITCOIN addresses these issues through a unique transaction pause and reversal protocol, enabling asset recovery in case of a wallet breach. This capability is a game-changer for users and exchanges, providing unmatched asset protection and control.

01

Enhanced Security for Exchanges and Wallets: MITCOIN's security protocols minimize the risk of asset loss, providing a secure trading and storage environment.

02

Transaction Reversal Mechanism: Users can request a pause on transactions and recover assets with valid proof of compromise.

03

Integrated Ecosystem: MITCOIN's ecosystem will include MIT EXCHANGE and MIT WALLET, providing a secure, user-friendly environment for digital asset management.

KEY FEATURES AND TECHNOLOGY

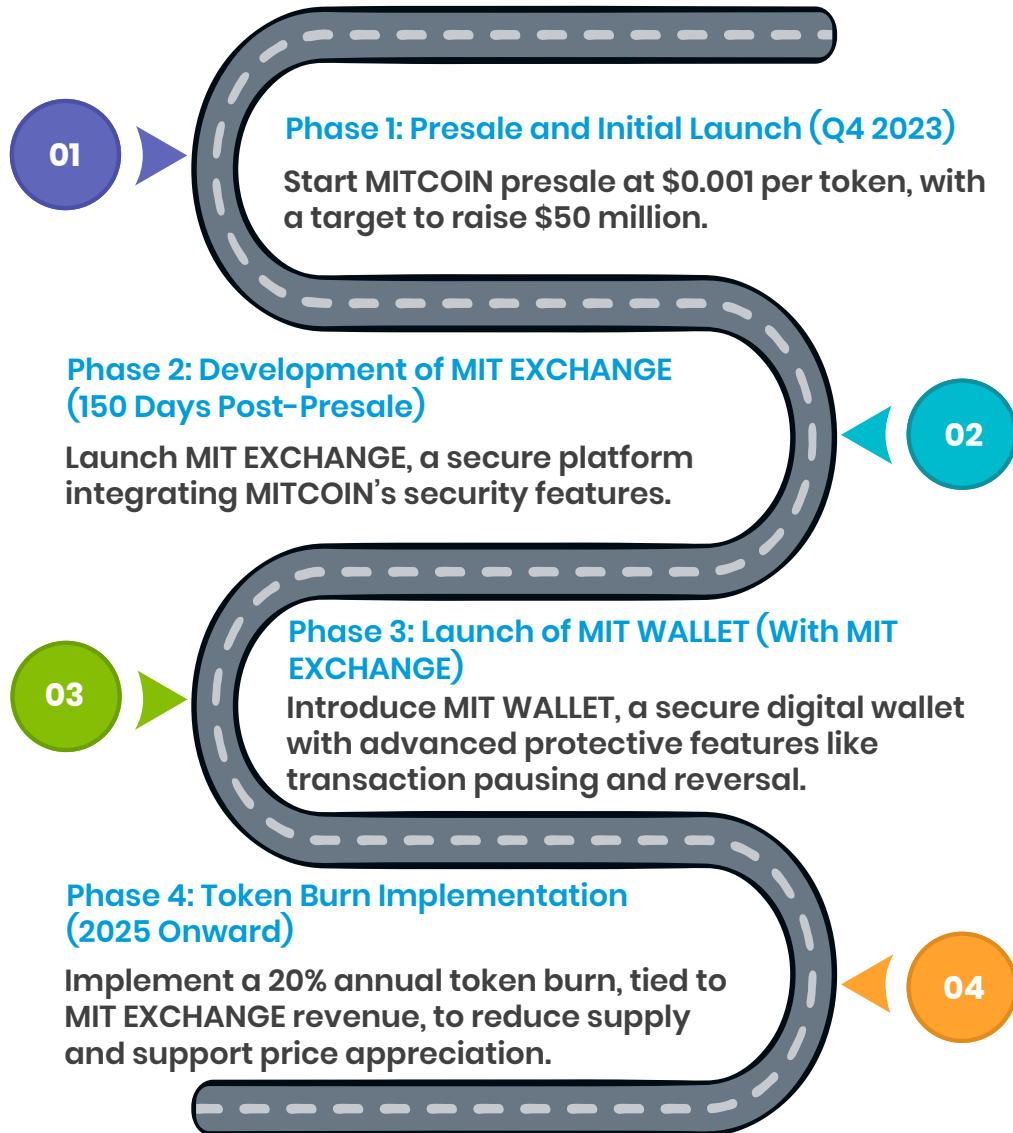

➤ *Transaction Pause and Reversal Protocol*

In the event of a wallet compromise, MITCOIN allows transactions to be paused temporarily. With valid proof, unauthorized transactions can be reversed, ensuring assets are not permanently lost. This feature is designed to protect users and exchanges from potential threats, offering a high degree of security.

MIT Exchange and MIT Wallet

- **MIT EXCHANGE:** Scheduled for launch 150 days post-presale, MIT EXCHANGE will provide a secure trading platform for MITCOIN and other cryptocurrencies, integrating MITCOIN's unique security features.
- **MIT WALLET:** Launching alongside MIT EXCHANGE, MIT WALLET offers a secure storage solution with built-in transaction pausing, ensuring assets remain safe.

ROADMAP

TOKENOMICS

Total Supply:

4 billion MITCOIN tokens.

Public Issue:

3 billion tokens available for public sale.

Locked Tokens:

10% of the total supply locked for 3 years, ensuring stability.

Development & Marketing Fund:

60 million tokens allocated for infrastructure, technology, and marketing expenses.

Presale and Pricing Strategy

MITCOIN presale will start at \$0.001 per token, with incremental increases to meet the \$250 million target. This approach incentivizes early investment and establishes initial market value.

Growth and Price Projections

Q4 2025:

Projected price of \$5 per token.

Q2 2026:

Projected price of \$10 per token.

End of 2027:

Expected price of \$30 per token, driven by token burns and increased demand.

ANTI-DUMPING & VESTING STRATEGY

To maintain stability and prevent mass sell-offs, MITCOIN has incorporated a vesting schedule for airdropped tokens:

Initial Airdrop Release: 50% of airdropped tokens are distributed immediately.

Month 1 Post- Airdrop:

25% of tokens released.

Month 2 Post- Airdrop:

Remaining 25% of tokens released.

This phased release prevents sudden dumps and allows for steady market growth as the project matures.

TOKEN BURN MECHANISM

To support long-term value growth, MITCOIN will implement an annual token burn rate of up to 20%. The burn percentage will be dynamically tied to the revenue generated by MIT EXCHANGE, adjusting annually based on financial performance. This mechanism ensures that MITCOIN's supply reduces over time, with a target of reaching 500 million tokens by 2030 or sooner, depending on exchange revenue.

TEAM BACKGROUND

MITCOIN is developed by a team of finance and technology experts with over 50 years of experience in the financial industry. This extensive background enables MITCOIN's team to understand and address the critical security issues in the cryptocurrency market. Their mission is to establish MITCOIN as a world currency, delivering unparalleled security, trust, and innovation to users worldwide.

GROWTH PROJECTIONS

MITCOIN's growth strategy is underpinned by its security-first approach and the phased development of its ecosystem. The launch of MIT EXCHANGE and MIT WALLET will provide a secure foundation for MITCOIN's adoption as a world currency.

Q2- 2025:

MITCOIN is projected to reach \$5 per token with the launch of MIT EXCHANGE and MIT WALLET.

Q4- 2025:

Expected to reach \$10 per token as adoption and usage grow.

End of 2027:

Target price of \$30 per token, supported by a combination of token burns and reduced circulating supply.

CONCLUSION

MITCOIN sets a new standard in cryptocurrency security, offering features like transaction reversal and an integrated ecosystem that includes MIT EXCHANGE and MIT WALLET.

With a focus on user safety, controlled supply, and a sustainable growth model, MITCOIN is designed to be a global leader in digital assets. Our token burn mechanism, anti-dumping vesting strategy, and experienced team underscore our commitment to creating lasting value for MITCOIN holders.
